## Revisiting the limits to growth: A global forecast for the next forty years

Professor Jorgen Randers, Climate Strategy, BI Norwegian Business School

This is an opportunity to hear from one of the world's great futurists on how the global economy and society will respond over the next forty years to pressures on resources, food, water, population growth and climate change.

Jorgen Randers is one of the world's most respected and rigorous global systems experts. Forty years ago he co-authored the best-selling environmental book of all time – The Club of Rome's 1972 *Limits to Growth*. Now, 40 years later, Randers asks the question: What will the world look like in another 40 years? His answer is in his new book, 2052 - A Global Forecast for the Next Forty Years.
