

BLESSING MENE UNFIRE

UNFIRE

SUPPORTING SMALLHOLDERS IN NIGERIA

UNFIRE produces novel, culturally-acceptable poultry/livestock feeds that is

- a) **Low-cost:** 60 – 80% lesser than existing feeds solution
- b) **highly nutritional:** made from readily-available but unexploited environmental resources & agricultural waste such as mango seed kernels; elephant grass; maize and cassava waste from milling plants etc.

Secondarily, UNFIRE operates a **community-based** and **self-supportive** model where local youth groups are positively engaged in the collection of raw materials which are purchased by UNFIRE (fair-trade) and rural women are recruited, trained and empowered to run their own businesses as vendors supplying and selling these farm products (grown with UNFIRE feeds) within their own communities.
