

## **Sustainability Leadership**

**23–24 February 2017, Madingley Hall, Cambridge**

This two-day professional development programme will focus on developing individual leadership capabilities in order to better work across organisational boundaries.

## Sustainability Leadership Laboratories (Labs)

CISL Labs are two-day professional development events. They focus on the most pressing issues and cutting-edge opportunities relating to sustainable business.

By attending Labs, participants develop their effectiveness as sustainability leaders, share and learn from others and become change agents. They also widen their network and become a member of CISL's international alumni network.

### Developing System Leadership

Catalysing collaborative partnerships can be a powerful vehicle for stimulating change on a large scale and within a relatively short time. Traditional leadership development efforts typically focus on the attitudes, skills, and knowledge needed to be successful within an organisation. In a complex, global world it is more important than ever to expand traditional leadership frameworks, and develop the capabilities to engage in value-creating, cross-stakeholder efforts.

### Benefits of attending

Join other senior professionals at this Lab to explore the concepts of sustainable leadership and the skills needed to be effective in an increasingly inter-dependent world.

Learn how sustainable leaders can enable efforts to:

- Overcome internal silos and barriers for collaboration to fully leverage an organisation's strengths and capabilities
- Proactively shape an organisation's external operating environment to help meet organisational objectives
- Leverage resources from others (capital, know-how, reputation, manpower, etc.) such that organisational objectives are achieved
- Simultaneously advance both your own objectives and those of internal and external collaborators through pursuit of shared goals
- Identify high leverage areas for your organisation where improving sustainable leadership can make a difference

*"Very informative, stimulating and an excellent networking opportunity."*

John Midgley, Principal Geoscientist & Operations Geologist, Energy Geoscience

*Madingley Hall*

### How the Lab is delivered

The Lab will use a series of tools and exercises to help attendees develop a system-leader mind-set for pursuing organisational goals. There will be ample opportunities for discussion and debate. Before the Lab, participants will be asked to undertake an individual assessment which will be used in the sessions. By the end of the Lab, participants will leave committed to taking action.

### Learn from industry experts and thought leaders

The Lab will feature interactive sessions and case studies by business leaders who have integrated sustainability agendas into their management and operations. Speakers include:

Andreas Schaffer — Founder, Avelerion Capital

Stephen Hall — Principal, Avelerion Capital

### Further Information, Application and Fees

Acceptance is by application and selection only. The Lab will be attended by a maximum of 25 participants. Applications will be reviewed on a rolling basis with places offered at regular intervals. Early application is advisable.

In order to facilitate attendance there are differential fees based on your sector with **discounts available for applicants from NGOs, the public sector, academia, self-funders and those based in developing countries**. See our website for details.

There are **group discounts** available for organisations sending multiple participants.

For further information, details of entry requirements, fees, how to apply and testimonials from previous Lab attendees please visit the website [here](#).
